

## Jeff Schneider, Enterprise Architecture Practice Manager

Jeff Schneider is the founder of Momentum and serves as the practice manager for the Enterprise Architecture Group.

Jeff is internationally known for his work related to web service and service oriented architectures. His concepts of service networks, enterprise vocabularies and the “service oriented enterprise” serve as a blueprint for companies to upgrade not only their enterprise architecture, but also their people and processes.

In addition to web services and service oriented architectures, Jeff has a deep background in:

- I.T. and Business Alignment
- Process Instilment and Personnel Education
- Enterprise Application Integration
- Package Application Customization
- Java and the J2EE platform (He authored the first book on J2EE in 1996)
- The Microsoft .Net platform

Jeff has worked in a variety of industries and served clients such as:  
3M, Sabre, Motorola, Ford / The Associates, The Annuity Board

Jeff’s current research includes: service oriented methodologies, managing metadata across large enterprises, policy based network computing and the convergence of web service orchestration and human workflow.
